TAKING CARE OF YOUR LAWN

Read about [Mowing](#) and [Watering](#).

Having an attractive and healthy lawn takes time and dedication. Some of our customers enjoy taking care of their lawns, while other prefer having it done for them. At Kruse's Farm Supply and Garden Center, you can have it whichever way best suits your lawn and your lifestyle. Our professional service is designed to give your lawn the attention to detail that it deserves. Our Do-It-Yourself Program offers a choice of 4 and 5 step programs that you can choose to meet your needs. We support the Ferti-lome line, which provides a number of options to let us customize a program for every lawn and every different situation. You can save by purchasing the products you will need for the year, and we even offer free storage for your program materials.

I thought a yard was 3 feet, and then I started mowing the lawn.

For more information on: Grass Composition, Turf Color, Thatch, Lawn Diseases, Weed Control, Mowing, Insect Control, and Watering, go to the links on the green sidebar. Then, call Steve Kruse to discuss your requirements for any of these services or to ask a question at 574-848-4151.
